

Double side extension / single rear extension: April – July 2018

After making the decision to extend our home, we had the massive task of choosing someone to manage the project from start to finish! We had considered trying to project manage ourselves, but we 100% think we made the right decision, letting K P Deane take that stress away from us. Even when we had wanted to add additional things along the way, and tried to estimate what it may cost, their costs were always lower.

We had a lot of quotes, K P Deane being one of the more reasonable quotes. After much deliberation we decided they were the right company to go with. Rees put us in touch with some former customers, so we could see similar jobs they had completed, and they were given glowing reports. This really confirmed we had made the right choice.

The team were all great, all very polite and made sure they tidied up after themselves each day. Really genuine, trustworthy lads. Even though each member of the team has their own profession, they all get stuck in whenever needed. They really are a great example of a tight team.

Rees had already given us an overview of how the work would be carried out, and they hit all planned timescales. We made a few changes along the way, to which they always accommodated and advised us on. The finished product is perfect, and we would not hesitate to recommend or reuse K P Deane ourselves. In fact, we've already recommended them several times, and had quite a few stranger knocking asking about their work, as they had seen the vans outside.

We really appreciate how smoothly the project ran. So a huge thank you to Rees and the lads for making it a pleasurable experience.

Many thanks,

Alex Johnson & Andy Scott
